

## INSTALLATION INSTRUCTIONS IHD-3-2000-4500

File No.: ISOCS-IHD-3-2000-4500

Date: 09/15/15

## INSTALLATION INSTRUCTIONS

- 1. Refer to submittal package prepared by ISOTECH Industries and locate each isolator based on model # and identification tag provided
- 2. Attach upper hanger rod to structure and secure it at the bottom of neoprene element. Leave at least 1/4" gap between isolator housing and structure
- 3. Mount equipment, piping or ductwork to isolator using lower hanger rod
- 4. Follow star pattern sequence shown below and turn leveling nut to level equipment once all isolators are installed
